requesting his personal information, as well as information about whether he placed the call

from his subscriber telephone number or from another number; in parallel, an identifying

password is requested, so that once all the information has been checked and compared, with

the possibility of correcting mistakes or canceling, the user goes on to a consignee data form;

in this form, the user reflects the information corresponding to the place where the shipment is

to be delivered, and this is followed by another form corresponding to the information about

this delivery in terms of lead time, time of day, day, month and year for the delivery; next,

communication is established with the supplier company, and the user's encrypted data is sent

and his purchase confirmed.

1 Claim 3 (original): Security system for commercial transactions via the Internet or other

communications networks, according to claim 2, wherein the user places the call from a

number other than his own phone number, the application, after checking to make sure that

this subscriber number appears on the form, establishes a pre-determined period, for example, 4

5 24 hours, to confirm the purchase from his own phone number.
